of Medical Sociology, Health Services Research Rehabilitation Science

Discipline, subject: Sociology of health and illness

Focus topics: Science, Technology, and Medicine Studies;

Qualitative Methods; Feminist Theories, Gender, and Diversity; Neurotechnologies

Interest in issues related to sex, gender and diversity aspects in medical research:

Use of new technologies and therapies and gender (e.g., DBS); diversity in methodologies;

(Non-)Reproduction and Gender; social inequality and diversity in medical treatments

Available for doctoral supervision: yes no

Maybe add one personal sentence about yourself, the passion for your workfield and/or the work with doctoral students at your institute.

Assessing the often invisible categories that shape our social environment is, in my view,
crucial for fostering an effective and fair medical practice.
