

WE HAVE APPLIED FOR EACCME POINTS!  
RECOGNIZED BY ALL LOCAL CERTIFICATION BODIES.

VACCELERATE has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101037867.

## DECEMBER 10 2024, 13.00-14.00 (CET) EU-COVPT-1 CoVacc: COVID-19 Vaccination in Children

With Prof. Dr. Patricia Bruijning-Verhagen, UMC Utrecht, Netherlands

UMC Utrecht is conducting the VACCELERATE CoVacc Study to investigate whether one dose of the Pfizer-BioNTech COVID-19 vaccine is as effective as two doses for children aged 5 to 11 who have previously had COVID-19.

The study aims to determine if a single shot offers similar protection, with fewer side effects and less stress for the child. The study enrolled children in Europe, including the Netherlands, who have had COVID-19 but not yet been vaccinated.

The study compares the effects of one versus two injections on immune response and protection against new variants.

In this exclusive webinar on the CoVacc Study, Patricia Bruijning-Verhagen will provide an in-depth overview of the study's key findings, its impact on public health, and the ongoing research in the field of COVID-19 vaccinations for children.

**VACCELERATE, the EU funded clinical research network for the coordination & conduct of European vaccine trials is looking forward to hosting this webinar.**

**The webinar will be recorded and published on <https://vaccelerate.eu/>.**

In cooperation with:

UNIKLINIK  
KÖLN

Webinar:

EU-COVPT-1 CoVacc

Presented by

Prof. Dr. Patricia  
Bruijning-Verhagen

Moderated by

Assistant Professor Dr.  
Cristina Prat Aymerich

Presentation approx. 1  
hour including Q&As

**Registration:**
